

SUGANYA S

ABOUT ME

Passionate B.Tech student specializing in Artificial Intelligence and Data Science, seeking opportunities to work in Python, Machine Learning, Deep Learning, Computer Vision, and Software Development. Eager to apply my technical knowledge to develop innovative AI-driven solutions, solve real-world problems, and continuously enhance my skills while contributing to the success of a forward-thinking organization.

EDUCATION

B.TECH IN ARTIFICIAL INTELLIGENCE & DATA SCIENCE

COLLEGE NAME: JP COLLEGE OF ENGINEERING

LOCATION: TENKASI

GRADUATION: 2028

CURRENT STATUS: 3RD YEAR (PURSUING)

RELEVANT COURSEWORK: DATA STRUCTURES, DATABASE MANAGEMENT SYSTEMS (DBMS), PYTHON, FUNDAMENTALS FOR DATA SCIENCE, DESIGN & ANALYSIS OF ALGORITHM, OS, AI, ML, COMPUTER NETWORK, DPCO

SKILLS

* DATA ANALYTICS & VISUALIZATION: POWER BI, MICROSOFT EXCEL (ADVANCED)

* PROGRAMMING LANGUAGES: PYTHON , JAVA (BASIC), SQL

* AI&ML: AI, ML, COMPUTER VISION, TENSORFLOW

*WEB TECHNOLOGIES : HTML, CSS, FLASK

PROJECTS

OPTIVOYAGE

- OptiVoyage is an AI-powered marine route optimization system that helps ships find the safest and most fuel-efficient path by analyzing weather, ocean conditions, and navigation data. It uses pathfinding algorithms to reduce travel time, fuel consumption, and operational costs while improving maritime safety.

GESTURE INTO TEXT

- An AI-powered web application for brain tumor detection and severity analysis from MRI scans, using Flask, deep learning, and explainable AI (Grad-CAM) to provide prediction results and visual insights.

ARTIFICIAL TREE

- Formulated a conceptual framework for an eco-friendly tech system centered on ecological data and environmental sustainability.
- Conducted baseline research and architectural mapping to support future green infrastructure modeling.

SALES & REVENUE ANALYSIS DASHBOARD

- Developed an interactive dashboard to analyze sales performance, revenue trends, and KPIs using data visualization techniques for better business decision-making.

CUSTOMER SEGMENTATION PROJECT

- Built a customer segmentation model by analyzing customer behavior and demographics to identify key customer groups for targeted business strategies.

PREDICTIVE ANALYTICS USING HISTORICAL DATA

- Created a predictive analytics model using historical data to forecast future trends and support data-driven planning and decision-making.

DATA CLEANING & REPORTING AUTOMATION

- Designed an automated workflow to clean, preprocess, and validate datasets while generating reports and visual summaries to improve efficiency and data quality.
-

HACKATHONS & ACHIEVEMENTS

- Participant, Smart India Hackathon (SIH)
- msme hackthon 5.0
- Selected for Round 2, Tenkasi Hackathon
- Selected for Round 2, Hackathon 360 (EC Learnix)

CERTIFICATIONS & WORKSHOPS

- Microsoft Azure AI Fundamentals (AI-900)
 - Python Certification & Data Science Workshop & completed data science & analytics course in hp foundation
 - AI for business professionals
 - Microsoft : Experimen with Azure Machine Learning,Operationalize machine learning and generative AI solutions
 - Power BI Workshop & Digital Skills Program
 - Stock Market Using AI Workshop | Tech Discovery Workshop (Maker Village, Kochi)
 - Advanced computer vision with TensorFlow (infosys)
-
